Hoosick Falls, NY 12090

Re: Wiring Safety Analysis

Zoning Board members,

Nexamp has completed a review of the wiring layout for Wilson Hill Solar. At the November Zoning Board meeting, an inquiry about above and below ground wiring safety and alternatives was raised. This topic was also discussed at a site visit with members of the zoning board.

Nexamp Engineering has confirmed with the Hoosick Falls Building Inspector, that National Electric Code 2023 and International Building Code 2021 is sufficient for code compliance. The National Fire Protection Association (NFPA) develops and publishes a revised National Electric Code every three years. NFPA is a non-profit organization devoted to eliminating death, injury, property, and economic loss due to fire, electrical, and related hazards. The Wilson Hill Solar design schema is entirely in compliance with this code. Finally, after further discussion, a more exact understanding of what wiring is above and below the ground was discussed, and concerns further allayed.

Sincerely  
Eamon Riley
